FORTRE//®

SOLID TIMBER CORE DOORS

INTRODUCING

THE FORTREZZ® SOLID TIMBER CORE DOOR

INNER STRENGTH OUTER BEAUTY

The vast range of FORTREZZ® Composite Doors combines all the benefits of modern materials, state of the art manufacturing and unrivalled good looks...

FORTREZZ® INSIDE

With a unique and unequalled 48mm thick cross bonded, veneered and laminated solid timber core, the door delivers strength and dimensional stability that simply cannot be matched by other products.

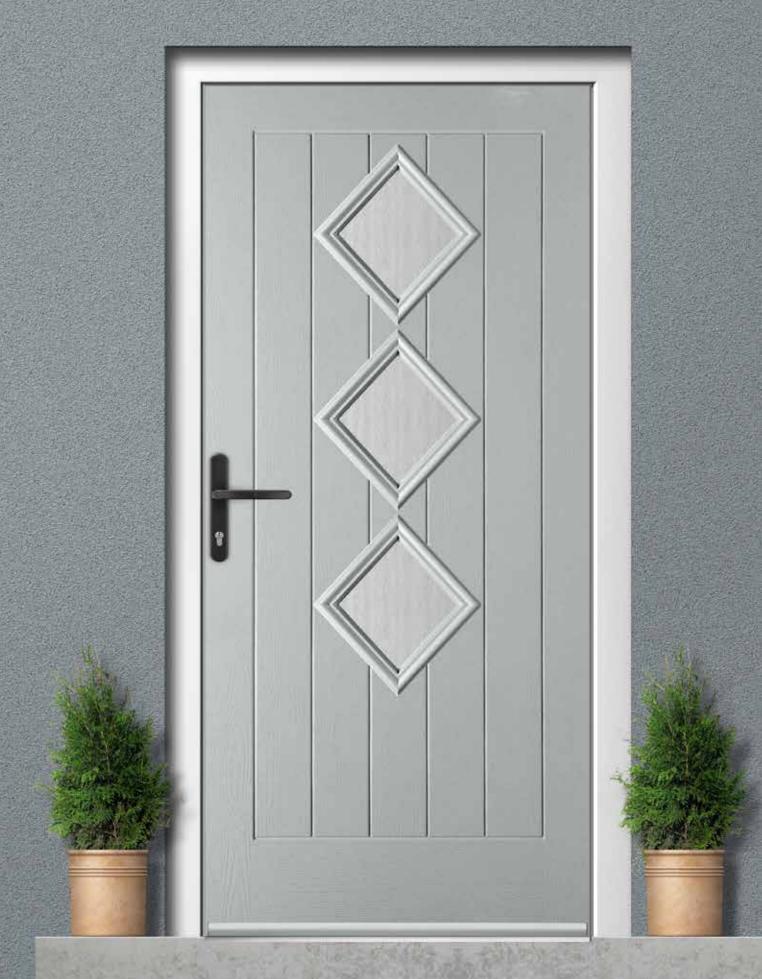

FORTREZZ® Doors are made up of no less than 17 separate laminations which makes the door almost 10% thicker than most other Composite Doors currently on the market today. With such levels of durability, looks and obvious security, our doors offer you complete peace of mind.

FORTREZZ® doors are manufactured in the UK and are compliant with all the required quality standards. The doors are constructed under the umbrella of the BMTrada Quality Management System, they possess all the necessary CE markings requirements, are Building Regulations Document Q compliant as well as carrying the coveted "Secured By Design" certification if required.

All our FORTREZZ® doors are fitted with the highest level of key locks which are both 3* and SOLD SECURE security tested and approved. There is no better standard available in today's marketplace.

18 colours to choose from

5 STYLES

THE FOUNDATION OF YOUR BESPOKE DOOR

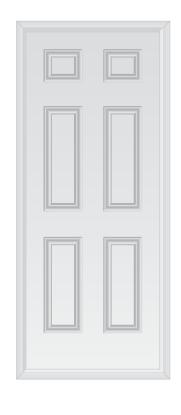

All of our Fortrezz doors are designed on top of 5 different styles of underlying panel.

Into each panel we create the design using a combination of glass panels, glass patterns together with a range of hardware to form your own door.

COUNTRY

CLASSIC

URBAN

The Country Collection - as it's name suggests - is based on the designs of original timber doors used in country or rural locations.

They emulate the planked timber construction methods employed by this type of door.

Two similar styles are used - a fullyplanked design or one with planks set inside a frame. This frame would traditionally be a top and bottom rail running horizontally and two vertical stiles (latch stile and hinge stile).

The Classic Collection is more typical of the suburban architectural styles of the last two centuries.

Loosely based on Georgian proportions and would have traditionally been made up with raised or 'fielded' panels set into the frame of the door. Each panel would have a decorative, sculptured moulding around it irrespective of whether it was solid or glazed.

The same methods of construction would be found in wooden furniture of the same periods.

The Urban Collection is a simpler, more modern design that uses either a plain, non-decorative panel or a design that has been used in modern timber doors using a horizontal planked design.

By their very nature, they don't need to comply with any visual style or architectural discipline. Glazing designs can be very geometric to emphasise their contemporary style and all designs work well in bold or subtle colours.

STRONG, SECURE, SAFE

WHICHEVER DOOR YOU CHOOSE FROM THOSE ON OFFER, YOUR SECURITY COMES AS STANDARD...

We know from experience and because we've spent many years listening to our customers that peace of mind is essential. It's not enough to have a great looking product, it's not enough to have one that performs well during the harshest winter, or the hottest summer. When you come home at night and close the door behind you, you'll want to know that you're safe!

FORTREZZ® Doors are fitted, as standard, with the very latest and highest level of security locking systems currently available. There are no 'upgrade' issues, no having to rethink budgets after you've chosen your ideal door - it's all included within the product cost.

Each standard door consists of 5 morticed Hook Bolts. There are two at the top of the door, one in the centre and a second pair at the bottom. Each of these pairs work together to hook towards one another and ensure that not only can they deter entry by force, they are able to stop any attempt to lever the door apart - in any direction!

WE SPENT A
FORTUNE ON THE
ITEMS FOR OUR HOME,
RISKING ALL OF THAT
FOR THE SAKE OF
ANYTHING LESS THAN
THE SAFEST OF FRONT
DOOR WOULD HAVE
BEEN MADNESS

SOLID CORE ABSOLUTE SECURITY

Built from up to 17 layers of laminated solid timber, our doors are 10% thicker than your average door!

Kerto is a laminated veneered lumber (LVL) that delivers unparalleled strength and dimensional stability. The engineered make up comprises of cross-bonded veneers that greatly enhance lateral stability and stiffness. The combinations of all these elements make this a natural choice for high security Composite Doors.

Kerto products are CE marked and certified by VVT Technical Research Centre of Finland, No 184/03.

PEACE OF MIND

FORTREZZ® doors are manufactured in the UK using UK based component companies to create the finished product. Our doors are fabricated to exacting standards and are compliant with all the necessary quality standards.

Our doors are constructed under the umbrella of the BMTrada Quality Management System. They possess all necessary CE marking requirements, are Building Regulations Document Q compliant and also carry the coveted 'Secured By Design' security standard if specified. All our doors are fitted with the highest level of key locks which are both 3* and SOLD SECURE security tested and approved. There is no better standard available in today's marketplace.

FRENCH DOORS

Our French Doors are available in an extensive range of styles, sizes and colour finishes, but to enhance the versatility further still, certain designs of doors can also be specified as an 'Offset' product. This allows narrow apertures, such as porch entrances for example, to benefit with the primary door being wider than the second 'slave' door.

The doors are fitted with a 3 point deadbolt system, locking the main door leaf into the slave leaf from top to bottom. With each set of doors having the benefit of balanced handles, it's reassuring to know that there are various colour options available to choose from.

Each door set has an interlocking central mullion which is available in either White, Polished anodised Gold or Silver finish only.

Please do note however, that French Doors are available as OPEN IN only.

Minimum width of double doors is 1728mm and the maximum is 1998mm (Including door frame) Minimum width of offset doors is 1243mm and the maximum is 1542mm (Including door frame)

With so many colours to choose from and each of them available as an option for both the inside and the outside, choosing the exact combination to suit your home is endless. Many of the options shown below can be installed into your home with a matching colour outer frame - just ask your FORTREZZ® representative for further information.

STABLE DOORS

If you are looking for a door to suit a traditional property, or simply trying to add more convenience to your everyday lives, then look no further than a classic Stable Door. Suitable as both Front and Back Doors, they are available in an extensive array of styles and colours.

The door comes with not one, but two completely separate high security locks, with a high strength centre gearbox. A conventional handle operates the top lock and a key/ thumb turn operates the bottom lock which is fitted with a roller latch for ease of use. Of course, a single key fits both parts, meaning no need to carry more than one.

- Available as OPEN IN only.
- Key operated bottom lock escutcheon. Chrome or Gold
- Central meeting rail seal is available in either polished Gold or Silver finish.
- Central locking Shoot Bolt is available in either Gold or Chrome

FIRE DOORS

Most FORTREZZ® doors can all be supplied as an FD30 fire door option. Combined with the unique AV2 automatic locking system, your new FORTREZZ® door will offer you complete peace of mind with its exceptional levels of security, as well as adding the benefit of Fire protection.

All of our Fire Doors are rated FD30 and tested to the tough BS EN 1734-1:2008, which is the European normative standard for fire resistance.

As well as single doors, we are also able to offer combination doors with side or top light vision panels to BS 476 Part 22:1987 - a British Standard for fire resistance. Rest assured, Building Regulations for England and Wales recognise both the above standards as valid methods of test for Fire Resistant Doors.

WINKHAUS SLAM LOCK

SAFE, SECURE AND STRONG

The AV2 lock works by means of independent spring latches that automatically engage the hooks into the receiving keeps on the outer frame when the door is slammed shut.

This process will engage a hook lock both top and bottom and in doing so, automatically make the door safe from intruders. To open the door from the inside, simply pull the internal handle down as normal to release the bolts and centre latch.

For additional security or over night use, the key can be turned through 360 degrees to engage another deadbolt and ensure the lock is secured from both the outside as well as the inside.

Environmental concerns and the need to be more energy efficient are extremely important to us and our quest to act responsibly has never been stronger. With a sympathetic approach to both our surroundings, as well as the techniques we adopt, we never forget that constant changes and advancements in conservation management are actually having a positive effect on both what we produce and, the way we produce it.

FORTREZZ® Doors are made within a factory environment which works within the following guidelines to minimise on waste and energy consumption:

- As a committed member of our society, we have reviewed our work systems and wherever possible, minimised our waste, energy consumption and utility usage during manufacture.
- 2. We manage an extensive re-cycling programme which covers packaging, polystyrene, cardboard, PVCu, timber, paper, aluminium and steel alike.
- 3. All of the timber used in our Composite Doors has been harvested from forests which are managed to meet the social, economic and ecological needs of both present and future generations.
- 4. The laminated veneer core of our product is environmentally credited which includes PEFC and Chain of Custody. This ensures that the material used in your doors has been tracked from source to its final destination and that all of the product originates from

certified forests.

- 5. Renewable and recyclable, Kerto is a highly eco effective door core material throughout its life cycle. The timber is sustainably managed PEFC/FSC - certified from Finnish forests. Certification ensures that the entire forest supply chain promotes good practice and has the highest respect for both ethical and social standards.
- 6. Logistics are reviewed on a daily basis and delivery schedules adjusted to ensure that the minimum amount of miles are covered and thus the smallest volume of fuel is consumed.
- 7. In the manufacture of our FORTREZZ® Doors, we aim to source thermoplastic components and materials that contain nothing but LEAD FREE stabilisers, thus ensuring even less impact to our fragile environment.
- 8. All door frames are produced from a British EnergyPlusTM profile which provides unrivalled levels of energy efficiency and of course, extruded using 100% recyclable material which is also lead free.
- 9. Manufactured entirely in the UK to minimise our carbon footprint.

SUPERB ENERGY EFFICIENCY TECHNICALLY ADVANCED, MACHINE MADE, EFFICIENT DOOR SYSTEM

- All materials are sourced from British based companies and our doors are manufactured & assembled in Britain.
- Technical advances & highly efficient multi-chambered PVCu outer frames for maximum strength & insulating properties.
- From recycled water used during the manufacturing process, to large stock holdings that reduce our vehicles carbon emissions, we make every attempt to minimise our impact on the environment.
- Our modern factories with state of the art machinery ensures that the doors are manufactured with the minimum of energy consumption.
- From lighting facilities that dim in the sun and go out when there is no movement within the area, to a logistics fleet that is Euro 6 compliant, we take our responsibility as a manufacturer extremely seriously.
- Our products are highly energy efficient and carry BFRC certification to help you understand their values and the effect on our environment.

With so many colours to choose from and each of them available as an option for both the inside and the outside, choosing the exact combination to suit your home is endless. Many of the options shown below can be installed into your home with a matching colour outer frame - just ask your FORTREZZ® representative for further information.

A CHOICE OF 18 DOOR COLOURS now including ELEPHANT GREY

ColourTEK® Introducing ColourTEK molecular-bonded colours in thousands of BS and RAL colours
